← Battery

Smart charging

To slow down battery aging, your device learns from your charging habits and adjusts charging patterns accordingly. When the battery level reaches 80%, it may automatically defer charging to 100% until shortly before you need to use it.

Charging limit

To slow down battery aging, charging will stop when the battery level reaches 80%.

Reverse wireless charging Off

High performance mode

Gets the best possible performance out of your device, but may also increase power consumption and cause your device to heat up.

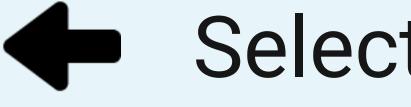

Optimize battery use

Automatically optimize power usage when apps are draining battery in the background.

Sleep standby optimization

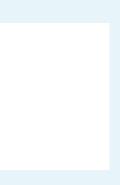

Your device consumes less power and sends fewer notifications when you are asleep.

App battery management

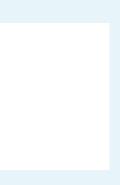

Select Optimize battery use
